Purpose

This "Domino's Pizza" test report provides a summary of the results of the test performed as outlined within this document.

Application Overview

"Domino's Pizza" is a Web or Mobile website used to order pizza. By using the website, you can order delivery or pick up from one of the stores. You can then select from pizza, sandwiches, sides, desserts, drinks, or meals that include all of these. If you choose pizza, you can choose the type of dough, the size, and the toppings. It is also possible to log in and save your favorite pizzas. The final step is to add your order to the cart and pay.

Testing Scope

The tests included mainly functional tests but also included interface, GUI, usability, performance, compatibility, security, accessibility, and survival & recovery tests. The tests were carried out in a division over five main modules: home page, stores, main menu, orders and login.

Testing Tree

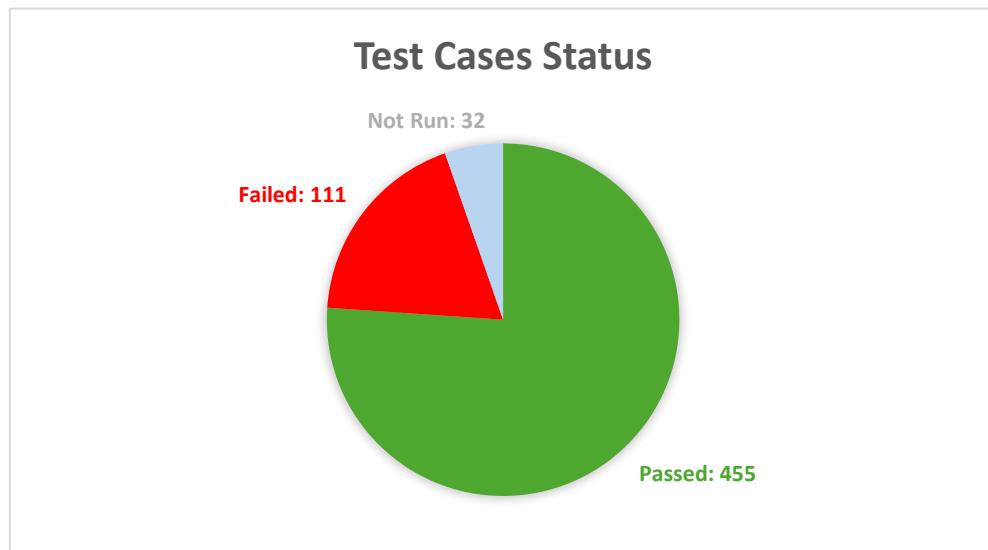

Metrics

Test Cases Status

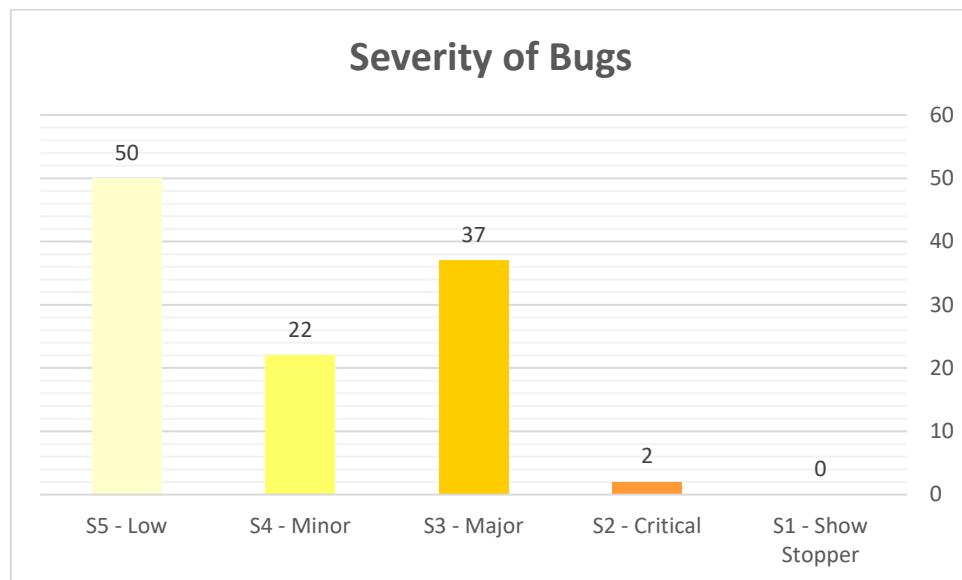

These metrics present the number of planned test cases, divided into passed, failed tests, and tests that were not run. Most of the test cases passed.

Passed	Failed	Not Run	Total
455	111	32	598

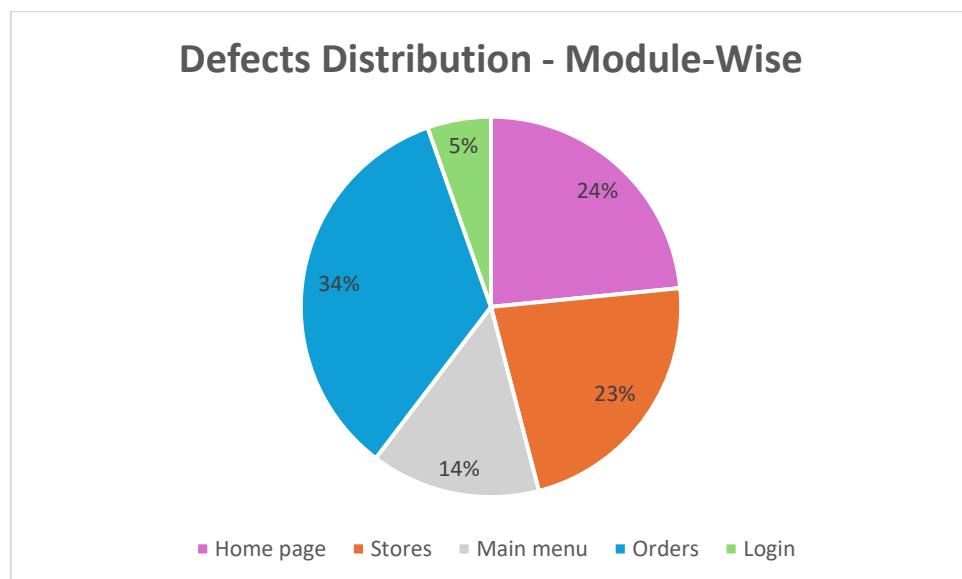

Severity of Bugs

This "clustered column" chart shows the number of bugs that were found, in division to severity level: low, minor, major, critical, and show-topper. Most bugs were classified as low severity, followed by major, minor, and critical. Show-stopper bugs were not found.

Defects Distribution – Module-Wise

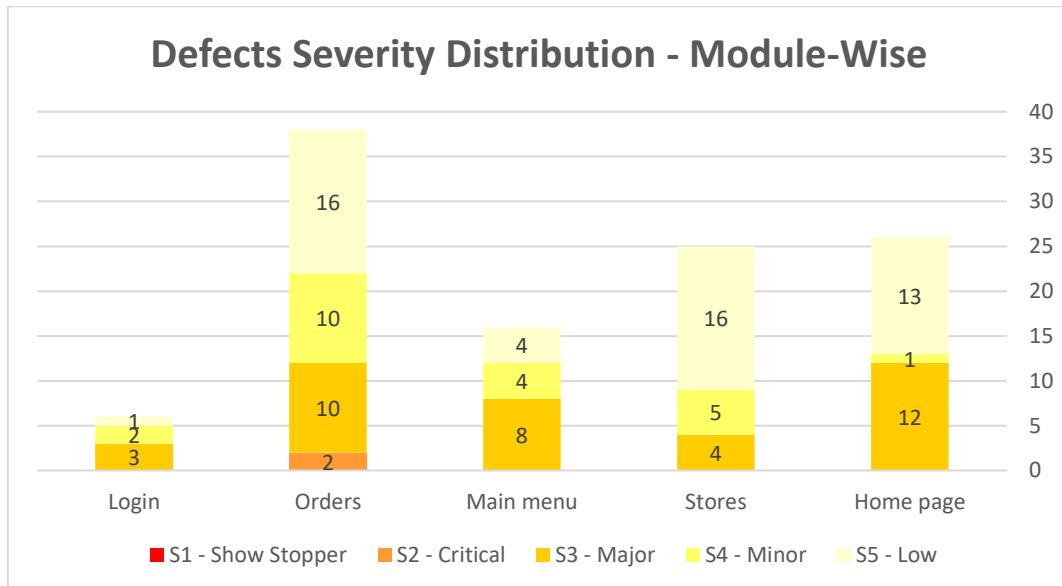

The pie chart below shows the bugs that were found by division of the five main areas tested: home page, stores, main menu, orders and login. Data are presented as percentages, and it is evident that the orders module had the most bugs, and the login module had the fewest.

Defects Severity Distribution – Module-Wise

The table and column chart below show the severity distribution of the bugs in each main area of the website. Both critical bugs are found in the orders area.

Module/Severity	S1 - Show Stopper	S2 - Critical	S3 - Major	S4 - Minor	S5 - Low	Total
Home page	0	0	12	1	13	26
Stores	0	0	4	5	16	25
Main menu	0	0	8	4	4	16
Orders	0	2	10	10	16	38
Login	0	0	3	2	1	6
Total	0	2	37	22	50	111

Recommendations

1. The website should be uniform in its design.
2. There shouldn't be spelling mistakes on any page.
3. All the links should work properly.
4. All the buttons should be clickable. For example, in the desserts section - it's not possible to choose "maple syrup dip" from "cinnamon bites" dessert.
5. In every meal, all the parts that are included should be selectable. For example, when choosing a meal that includes pizzas and desserts/sides - there is no option to choose the 2 desserts/sides included in the meal.
6. All the images should be displayed well. For example, on the page of the Yokneam store, there is an error loading the store image.
7. The language switching should work on all pages, and Hebrew and English should be available on all pages.
8. On the topping screen, there should be an option to clear all the toppings from the pizza and start over.
9. On the topping screen, there should be information about the selected pizza and dough type.
10. The toppings should be more clearly marked as extra costs in all relevant cases.

Conclusion

Following the various tests done on the "Domino's Pizza" website, 111 bugs were found. Most of them have a degree of severity between low and minor. There are however a significant number of major bugs and two critical bugs.

Overall, the website has a user-friendly design, and it performs its main functions, which are ordering from the menu and delivering to the customer's home or self-pickup. However, because of the high number of bugs found, including critical ones, I **would not recommend releasing the site.**

The screenshot shows the official website for Domino's in Israel (dominos.co.il/en). The page features a large banner image of a pizza. At the top, there are navigation links for 'English' and 'Jobs', and a search bar. Below the banner, there are buttons for 'Delivery' and 'Or' followed by 'Pickup'. A red circle highlights the word 'Follow' in the 'Follow us' social media call-to-action. To the right, there are download links for the app on Google Play and the App Store. The footer contains a list of various pizza types and locations, along with a 'Domino's' logo and a 'Chat with us' button.

This screenshot shows a specific page on the Domino's Israel website dedicated to gluten-free pizza options. The page title is "domino's פיצה משייקה: פיצה ללא גלוטן". The main text on the page discusses the availability of gluten-free pizza at Domino's, stating that it is possible to order a pizza without yeast or flour. It mentions that the pizza is made from special flour and yeast-free dough. The text also notes that Domino's has been working on this for many years and has received positive feedback from customers. There is a large red arrow pointing to the word "gluten" in the sentence "פיצה ללא גלוטן". Below the main text, there is a section titled "כיצד ניתן להזמין מזון משייך פיצה ללא גלוטן?" which provides instructions on how to order a gluten-free pizza. The page also includes a small note at the bottom about the availability of certain toppings.

The box includes the branch's name in large letters, its address ('שדרות אחיל 61, קריית חמי'), phone number ('1-700-70-70-70'), and delivery radius ('19.2 ק"מ'). Below this, there are tabs for 'משלוחי פיצה בקריית ביאליק' (Delivery to Kfar Saba), 'אריזות והמתנות בגלילות' (Packs and gifts in Galilim), 'ימי הוללת' (Promotional days), 'שף צער' (Chef Zurer), and 'גניות' (Guarantees). A section titled 'שעות פתיחה' (Opening hours) lists '12:00-02:00' and 'א-ה: 03:30-12:00'. To the right, a photograph of the actual Domino's store building is shown. At the bottom of the central box, there are two buttons: 'להזמנה' (Order now) and 'נווט' (Navigate). The top navigation bar shows the URL 'dominos.co.il/branches/Krayot-City/Krayot-Center' and the standard browser controls.

1. Open URL <https://www.dominos.co.il/>
2. Open the main menu on the right.
3. Click on “סניפים”.
4. Change the language to English.
5. Search the word “Yokneam”.
6. Open the “Yolneam” page.

Actual Result:

There is spelling mistake (“Yolneam”) in the name of the city on the stores page as well as in the headline of the specific store page.

Expected Result:

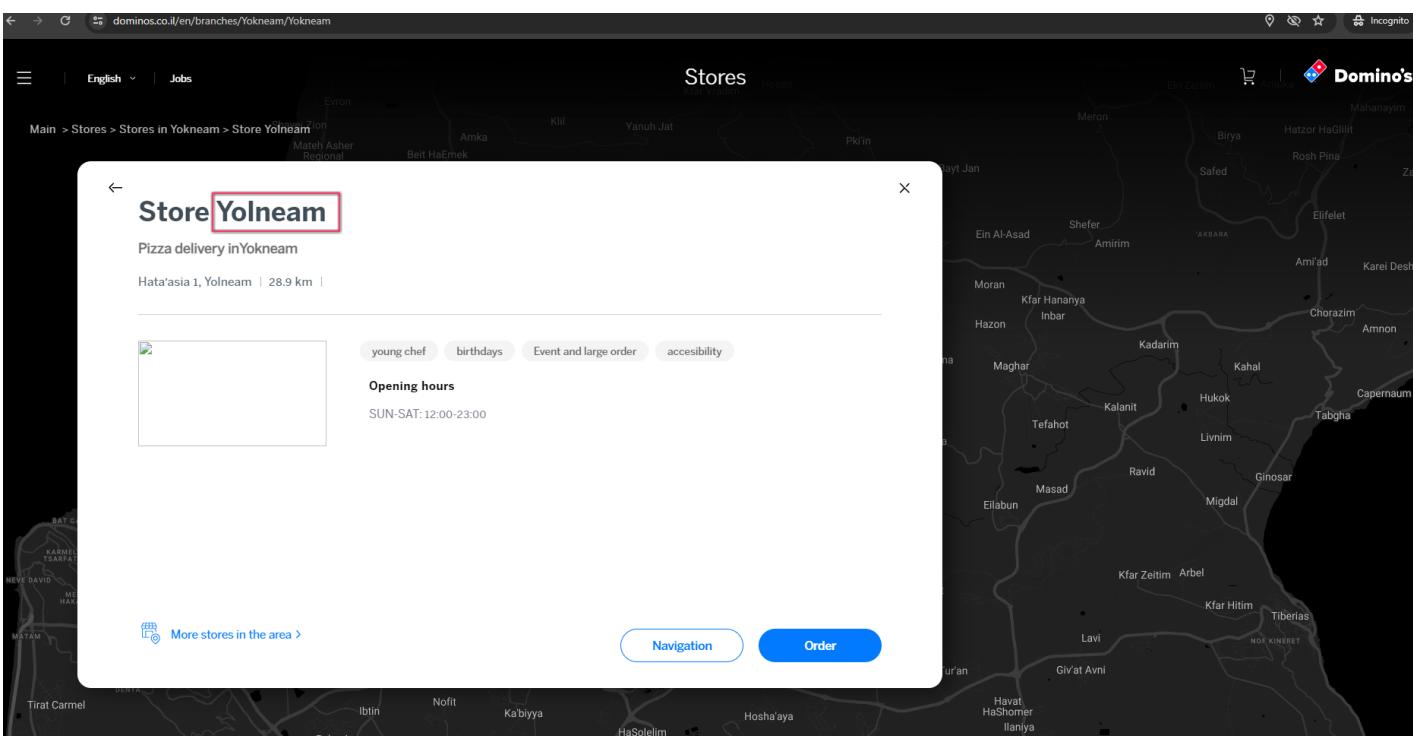

The word that should be written in the name of the city on the stores page as well as in the headline of the specific store page is “Yokneam”.

This screenshot shows the Domino's website for Israel. The main navigation bar includes 'English' and 'Jobs'. Below it, 'Main > Stores' is selected. A search bar at the top left says 'Search by store or city'. Underneath are several filter buttons: 'Open now', 'Kosher', 'young chef', 'birthdays', 'Event and large order', 'accessibility', and 'We're open'. The results list includes:

- Moria Haifa**: Moria 108, Haifa. Status: We're open. Distance: 28.6 km.
- Yokneam**: Hata'asia 1, Yokneam. Status: We're open. Distance: 28.9 km. This entry is circled in red.

- Zichron Ya'akov**: Hanadiv 26, Zichron Ya'akov. Status: We're open. Distance: 45.2 km.

The map in the background shows the geographical context of these locations, with major cities like Haifa, Carmiel, and Tiberias visible.

This screenshot shows the detailed view for the 'Store Yokneam' entry from the previous map. The page title is 'Stores > Stores in Yokneam > Store Yokneam'. The main heading is 'Store **Yokneam**'. Below it, it says 'Pizza delivery in Yokneam' and 'Hata'asia 1, Yokneam | 28.9 km'. There are several filter buttons: 'young chef', 'birthdays', 'Event and large order', and 'accessibility'. It displays the opening hours 'SUN-SAT: 12:00-23:00'. At the bottom, there are 'Navigation' and 'Order' buttons, along with a link 'More stores in the area >'. The background map is identical to the one in the first screenshot.

The screenshot shows a Domino's store page for 'Store Krayot Center'. At the top, there's a map of the area around Kiryat Bialik. Below the map, the store's name 'Store Krayot Center' is displayed, along with its address 'Ahi Eilat 61, Kiryat Haim | 19.7 km' and phone number '1-700-70-70-70'. There are several small circular icons representing services like 'young chef', 'birthdays', 'Event and large order', and 'accessibility'. A red arrow points to the 'Opening hours' link, which is located just below these icons. To the right of the opening hours link are two buttons: 'Navigation' and 'Order'. At the bottom left of the main content area, there's a link 'More stores in the area >'. The overall layout is clean and modern, typical of a food delivery app's storefront page.
